**Subject:** RE: Updated Dixie Fire Perimeter .kmz

From one of the developers of maps+. I just used the River fire to QC, and the NIFC layer they're pulling has that perimeter in it. So I think the answer is, if NIFC is tracking the boundary in their public service, then yes, maps+ will have it.

Hello [REDACTED]  
We don't maintain the fire data. We use these Map Services .  
[https://geomart.digicat.cloud.pge.com/arcgis/rest/services/WSOC/WSOC\\_Incidents\\_External/MapServer](https://geomart.digicat.cloud.pge.com/arcgis/rest/services/WSOC/WSOC_Incidents_External/MapServer) This is maintained by WSOC at PG&E  
[https://services3.arcgis.com/T4QMspbflg3qTGWY/ArcGIS/rest/services/Current\\_WildlandFire\\_Perimeters/FeatureServer/0](https://services3.arcgis.com/T4QMspbflg3qTGWY/ArcGIS/rest/services/Current_WildlandFire_Perimeters/FeatureServer/0) This is maintained by NIFC.  
I hope this helps.  
Thanks

No thank you, this doesn't help the fire agency at all. And, can you answer if the Dixie Fire perimeter will be exported to the Maps+ fire layers?

I got a request from [REDACTED] to have the camp fire boundary on a map. Is that helpful to keep on this daily map?

Yeah...This is mainly to show that the fire crossed underneath the Caribou-Table MTN 230kV line. Also, the GCC will be sending you an email with a list of supervisors that would like to receive updated maps moving forward.

For the record, this is only slightly bigger than what you sent this morning.

Blue outline was this morning, and red is just now.

Subject: Updated Dixie Fire Perimeter .kmz

[REDACTED]

Here's the latest updated .kmz from PSS [REDACTED] to update the current PG&E GIS asset map. Please reply all so that this gets disseminated to those that need it. And by the way, I spoke to CAL FIRE's GIS personnel and their plan is to try to have something posted to the FTP site for tomorrow's ops map.

Let me know if you need anything further.
